League of Legends

Ok so what is League of Legends?

League of Legends is a MOBA (Multiplayer Online Battle Arena) that is 5 vs 5 (Red vs Blue)

Both teams have a **Nexus**, and **Towers** that stand in front of their **Nexus**.

The goal of the game is to destroy the opposing teams **Towers** and eventually their **Nexus** to win the game.

Ok so what is League of Legends?

Traditionally the main game mode has a map that looks like this. 3 Lanes with 5 players on each team having 1 of 5 roles.

- Top Lane (Plays alone in the Top lane)
- Jungle (Runs around in the Jungle)
- Mid Lane (Plays alone in the Middle Lane)
- Bot Lane (Plays with their Support in Bot)
- Support (Babysits the Team)

However we will not focus on this game mode to start, we will instead do something a little more fun.

Traditionally the map looks like this

ARAM!!! (~~All Random~~ All Mid)

Instead of playing strategically like Uncls, what if we all went to the middle lane and just fought each other?

Well that's what we're doing! In this case it's a bridge

The premise is still the same however.

Both teams have a **Nexus** and **Towers** stand in front of their **Nexus**.

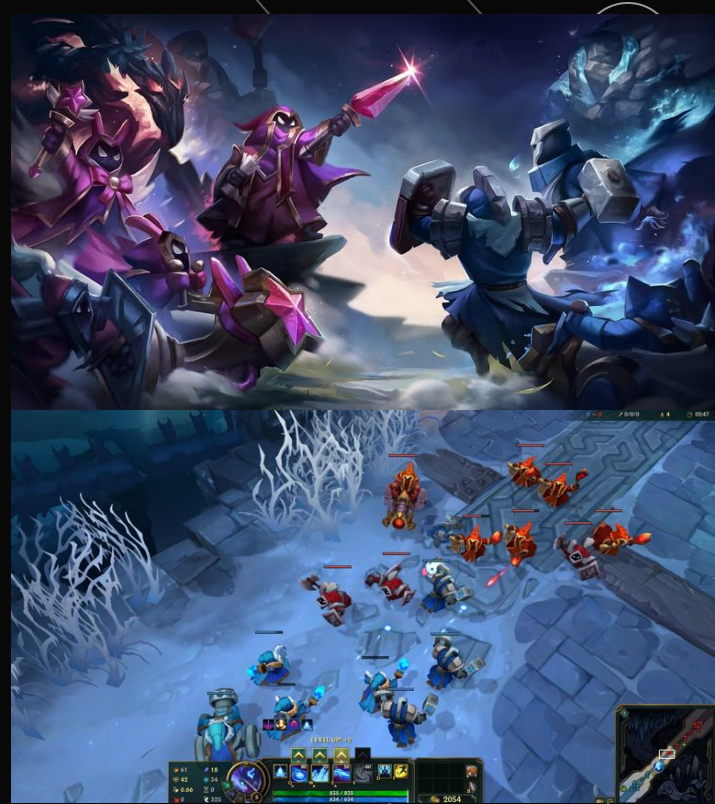

The goal of the game is to destroy the opposing teams **Towers** and eventually their **Nexus** to win the game.

ARAM!!! (~~All Random~~ All Mid)

To help with this each team will have **Minions** that spawn at certain intervals

Enemy **Towers** deal BIG damage so you need to use your **Minions** to help take the enemy **Tower** (this means teams will fight to protect their minions)

These lil guys are Minions

Your Job

Throughout the game your **Champion** can **Level** up with **Experience**, or buy **Items** with **Gold** to become stronger

You earn gold by last hitting enemy **Minions**, killing enemies, and destroying **Towers**.

You also earn **Experience** to level up doing these as well

The higher **Level** you are and the more items you have the stronger you are to fight the enemies. Last hit their **Minions**, escort your **Minions** to their **Tower** and destroy their **Tower**

Your Job - Champions (The people you play)

Each player will choose their own **Champion**, each of which are unique.

Each **Champion** has 3 spells and an ultimate

Each **Level** allows you to unlock or upgrade one spell

Your ultimate unlocks or upgrades at **Level** 6, 11, and 16, the max **Level** is 18

Last Bits - Controls

Controls and Settings

The Default Controls are “Click to Confirm” meaning to cast a spell you must Click the spell, aim with your cursor, then left click to finally cast it.

We can change this if you don't like that to quick cast, where you aim with your cursor, press a spell button and the spell casts immediately)

Last Bits – Resources

Things you will want to
keep track of in a game

Health

How much damage you
can take before dying,

Once Health drops to 0
you will have to wait a
certain amount of time
before you respawn

You Restore Health in Base!

Mana

Your resource to cast
spells, certain spells
cost more mana than
others, once you're out
of mana you may be
unable to cast some
spells. (Not all
champions use mana)

You Restore Mana in Base!

Gold

Lets you buy Items in the
Shop
Items give you Stats
which make you
stronger!

You Spend Gold in Base!

Experience

Lets you Level up!
The higher your level the
more stats you have! The
stronger you are

Last Bits – Resources (Items)

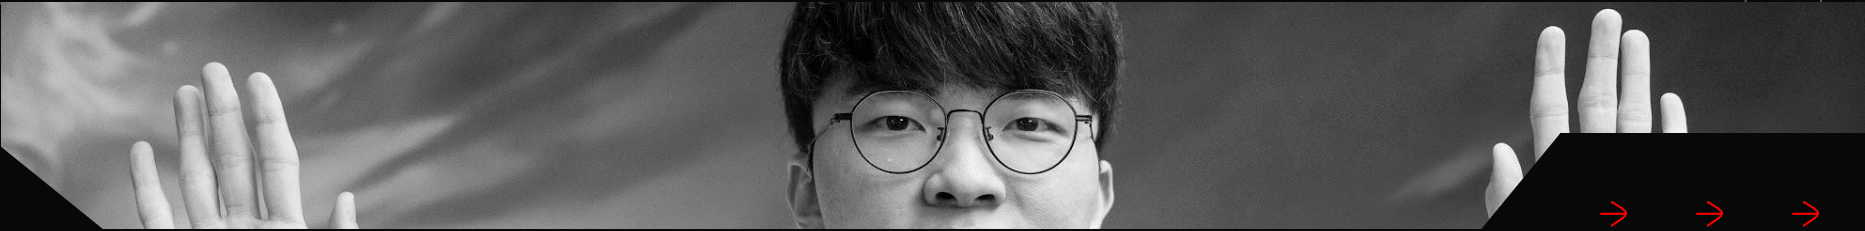

Things you will want to
keep track of in a game

Always Remember to Buy Items! You
start the game with gold to buy
items! In Aram you can not recall back
to base so you can only buy items
when you respawn, so make sure you
are buying items every chance you
get!
